A powerful orange appearance - the firefly as a symbol.

A wine that wants to distract us from negativity, pessimism and a focus on mistakes and draw our attention to the positive. Both the powerful creature the firefly and the colour orange stand for vital and mental strength as well as joy in life. They are considered to be a source of strength and want to direct us to the positive.

The firefly reminds us that love and passion mean more than tiny mistakes. A symbol of defining ourselves not by our shortcomings but by our abilities and peculiarities. The firefly also lights up for more biodiversity and against insect extinction. Dwindling habitat and light pollution are becoming an ever greater problem.

Our Lampyris is a symbol of more mindfulness of nature and mindfulness of ourselves - just like it, we should not adapt, but follow our passion.

Follow your passion - Find your light!
